

Anna Rychkova

Software Engineer (Node.js / TypeScript | Backend & Fullstack)

Dublin, Ireland

Phone: +353 85 286 35 18

Email: anna.rychkova.dev@gmail.com

GitHub: <https://github.com/AnnaRychkova1>

LinkedIn: <https://www.linkedin.com/in/annarychkova1/>

Portfolio: <https://annarychkova.dev/>

Profile

- **Software Engineer** building full-stack applications using **Node.js**, **TypeScript**, **React**, and **REST APIs**
- Backend-focused, with experience **designing APIs**, authentication systems (**JWT**, **RBAC**), and scalable data-driven services
- Practical experience with **microservices architecture** and understanding of how applications operate across networks (**TCP/IP**, **DNS**, **HTTP**)
- Security-aware mindset with practical exposure to **authentication flows**, **access control**, and **system behaviour** under real-world conditions
- Acted as team lead in a full-stack training project, **coordinating team contributions** using GitHub workflows, including pull requests, code reviews, and resolving merge conflicts.

Skills

- **Backend:** Node.js, Express.js, REST APIs, gRPC, JWT authentication
- **Frontend:** React, Next.js, Redux, Tailwind
- **Databases:** MongoDB, MySQL, Supabase
- **Languages:** JavaScript, TypeScript, Java, SQL
- **Tools:** Git, GitHub, Docker, Postman, Swagger
- **Concepts:** OOP, system design, client-server architecture, networking fundamentals (TCP/IP, DNS, HTTP)

Projects

Smart Recruitment | Solo Project | AI-Assisted Screening System

Node.js | Express | gRPC | MongoDB | OpenAI

- Designed and built a distributed microservices system for AI-assisted candidate processing
- Implemented backend services for CV parsing, interview scheduling, and data handling
- Automated up to 70% of manual screening workflows through API-driven architecture
- Developed service-to-service communication using gRPC and structured backend architecture

CodeCraft | Solo Project | Interactive Coding Platform

Next.js | TypeScript | Supabase

- Built and deployed an interactive coding platform with real-time code execution and validation workflows
- Implemented secure authentication and user session management
- Designed backend logic for code processing, error handling, and analytics tracking

AquaTrack | Team Lead | Water Tracker App

React | Node.js | Express | MongoDB

- Coordinated a team of 11 developers to deliver a full-stack application with authentication and synced data
- Designed and implemented REST APIs for user data and hydration tracking
- Managed GitHub workflows, pull requests, and merge conflict resolution across the team

Work Experience

Dec 2025 - Mar 2026 | State Street | Cyber Security Bootcamp (SOC & Fusion Center Exposure)

- Analysed backend systems and API behaviour in monitored environments, focusing on logging, monitoring, and anomaly detection
- Investigated simulated security scenarios, mapping attacker techniques (MITRE ATT&CK) to application-level vulnerabilities
- Applied hands-on labs (TryHackMe) to understand authentication flaws, access control issues, and secure API design
- Collaborated in cross-functional simulations, linking backend system behaviour with incident response and service reliability

2023-2025 | Software Developer (Independent & Collaborative Projects)

- Built and maintained backend services with focus on reliability, security, and data integrity
- Developed full-stack applications using Node.js, Express, React, and TypeScript
- Designed and implemented authentication systems using JWT and role-based access control (RBAC)
- Developed REST APIs with secure, scalable endpoints, input validation, and controlled data access
- Worked with client-server architecture and applied distributed system concepts in application design
- Coordinated team contributions using GitHub, including pull requests, code reviews, and resolving merge conflicts

2023 | Carlow County Development Partnership | Community Car Administrator

- Managed operational data and documentation with high accuracy
- Supported process improvements and system efficiency
- Collaborated with stakeholders across multiple functions

2011-2022 | Career break

- Managed family responsibilities while undertaking temporary and part-time roles.

2006-2011 | Zhytomyr Secondary School | Mathematics and Physics Teacher

- Strong analytical problem-solving background
- Improved structured reasoning and data interpretation skills

Education & Certification

2026 | CompTIA Network+ Certified

Focus areas: networking fundamentals, protocols, network security, troubleshooting

2024-2025 | National College of Ireland | Higher Diploma in Science in Computing

Modules: Computer Architecture Operating Systems and Networks, Software Development, Object Oriented Software Engineering, Introduction to Databases, Web Design and Client-Side Scripting, Data Structures, Algorithms and Advanced Programming, Distributed Systems

2023-2024 | GoIT Academy | Full Stack Developer

Modules: HTML+CSS, JavaScript, React, Node.js, TypeScript, Career Skills, Soft Skills

2022-2023 | Carlow Institute (VTOS) | English with Office Administration

2001-2006 | Zhytomyr State University | B.Ed. Teacher of Physics and Mathematics

Additional Information

Professional Development: Security-aware software engineering (authentication, access control, secure APIs). Currently expanding knowledge in backend scalability, system design, and cloud technologies.

Activities: Member of Carlow Dragon Boat Club – national and international award winner.

Soft Skills: Teamwork, analytical thinking, adaptability, attention to detail
