

Anna Rychkova

Software Engineer (Node.js / TypeScript | Backend & Fullstack)

Dublin, Ireland

Phone: +353 85 286 35 18

Email: anna.rychkova.dev@gmail.com

GitHub: <https://github.com/AnnaRychkova1>

LinkedIn: <https://www.linkedin.com/in/annarychkova1/>

Portfolio: <https://annarychkova.dev/>

Profile

- **Software Engineer** focused on backend and full-stack development using **Node.js, TypeScript, React, and REST APIs**
- Experience **developing REST APIs**, authentication systems (**JWT, RBAC**), and backend business logic
- Practical knowledge of **client-server architecture** and **networking concepts**, including **HTTP, DNS, and TCP/IP**
- Security-aware mindset with practical exposure to **authentication flows, access control, and system behaviour** under real-world conditions
- Acted as team lead in a full-stack training project, **coordinating team contributions** using GitHub workflows, including pull requests, code reviews, and resolving merge conflicts.

Skills

- **Backend:** Node.js, Express.js, REST APIs, gRPC, JWT, RBAC, Distributed Systems
- **Frontend:** React, Next.js, Redux, Tailwind
- **Databases:** MongoDB, MySQL, Supabase
- **Languages:** JavaScript, TypeScript, Java, SQL
- **Tools:** Git, GitHub, Docker, Postman, Swagger
- **Concepts:** OOP, Client-Server Architecture, API Security, Networking (HTTP, DNS, TCP/IP)

Projects

Smart Recruitment | Solo Project | AI-Assisted Screening System

Node.js | Express | gRPC | MongoDB | OpenAI

- Designed a distributed backend application with gRPC-based service communication
- Implemented authentication and role-based access control using JWT
- Developed AI-assisted CV processing workflows, reducing manual screening by ~70%
- Built modular services for candidate management, filtering, and interview scheduling
- Applied streaming RPC patterns for real-time and batch communication scenarios

CodeCraft | Solo Project | Interactive Coding Platform

Next.js | TypeScript | Supabase

- Built a full-stack coding platform with authentication and real-time execution workflows
- Implemented secure user authentication and session management
- Developed backend logic for code execution handling, validation, and error processing
- Integrated external API for real-time code execution and evaluation
- Designed analytics tracking for user activity and performance

AquaTrack | Team Lead | Water Tracker App

React | Node.js | Express | MongoDB

- Led a team of 11 developers in delivering a full-stack application
- Designed and implemented RESTful APIs for user hydration tracking
- Managed GitHub workflows including pull requests, code reviews, and merge conflict resolution
- Coordinated team delivery and ensured consistent backend/frontend integration

Work Experience

Dec 2025 - Mar 2026 | State Street | Cyber Security Bootcamp (SOC & Fusion Center Exposure)

- Completed hands-on training in system monitoring, API behaviour, and security concepts in simulated SOC environments
- Explored authentication and access control through practical labs (TryHackMe)
- Investigated common API vulnerabilities and secure backend practices
- Participated in scenario-based exercises linking system behaviour with security concepts (MITRE ATT&CK)

2023-2025 | Software Developer (Project-based experience)

- Developed backend and full-stack applications using Node.js, TypeScript, React, and MongoDB
- Designed and implemented REST APIs with authentication flows and role-based access control
- Built backend logic for data validation, API integration, and secure data handling
- Applied client-server architecture principles across real-world and production-style projects
- Collaborated using GitHub workflows including pull requests, code reviews, and merge conflict resolution

2023 | Carlow County Development Partnership | Community Car Administrator

- Managed operational data and documentation with high accuracy
- Supported process improvements and system efficiency
- Collaborated with stakeholders across multiple functions

2011-2022 | Career break

- Managed family responsibilities while undertaking temporary and part-time roles.

2006-2011 | Zhytomyr Secondary School | Mathematics and Physics Teacher

- Strong analytical problem-solving background
- Improved structured reasoning and data interpretation skills

Education & Certification

2026 | CompTIA Network+ Certified

Focus areas: networking fundamentals, protocols, network security, troubleshooting

2024-2025 | National College of Ireland | Higher Diploma in Science in Computing

Modules: Computer Architecture Operating Systems and Networks, Software Development, Object Oriented Software Engineering, Introduction to Databases, Web Design and Client-Side Scripting, Data Structures, Algorithms and Advanced Programming, Distributed Systems

2023-2024 | GoIT Academy | Full Stack Developer

Modules: HTML+CSS, JavaScript, React, Node.js, TypeScript, Career Skills, Soft Skills

2022-2023 | Carlow Institute (VTOS) | English with Office Administration

2001-2006 | Zhytomyr State University | B.Ed. Teacher of Physics and Mathematics

Additional Information

Professional Development: Security-aware software engineering (authentication, access control, secure APIs). Currently expanding knowledge in backend scalability, system design, and cloud technologies.

Activities: Member of Carlow Dragon Boat Club – national and international award winner.

Soft Skills: Teamwork, analytical thinking, adaptability, attention to detail
