LinkedIn: <https://www.linkedin.com/in/annarychkova1/>

Portfolio: <https://annarychkova.dev/>

Profile

Software Engineer focused on backend and full-stack development using **Node.js**, **TypeScript**, **React**, and **REST APIs**. Experienced in building authentication systems (**JWT**, **RBAC**), API-driven architectures, and full-stack applications. Strong understanding of client-server systems, security-aware development, and modern web architecture. Comfortable working in team environments using GitHub workflows and agile collaboration.

Skills

- **Backend:** Node.js, Express.js, REST APIs, gRPC, JWT, RBAC
- **Frontend:** React, Next.js, Redux, Tailwind
- **Databases:** MongoDB, MySQL, Supabase
- **Languages:** JavaScript, TypeScript, Java, SQL
- **Tools:** Git, GitHub, Docker, Postman, Swagger
- **Concepts:** API Security, Client-Server Architecture, Distributed Systems, Networking (HTTP, DNS, TCP/IP)

Projects

Attaboy Dog Training | Production Business Platform

Next.js | React | Firebase | TailwindCSS | Vercel

- Developed and deployed a production business platform for client operations and communication
- Built admin tooling, workflow protections, and automated email notification system
- Implemented authentication and role-based access control using Firebase Auth
- Managed deployment workflows and production releases via Vercel

Smart Recruitment | AI-Assisted Screening System

Node.js | Express | gRPC | MongoDB | OpenAI

- Built a modular recruitment system using REST APIs and gRPC service communication
- Implemented JWT authentication and role-based access control
- Developed AI-assisted workflows for CV processing, filtering, and interview scheduling
- Designed backend service communication using gRPC streaming patterns

CodeCraft | Interactive Coding Platform

Next.js | TypeScript | Supabase

- Built and deployed a full-stack coding platform with authentication and admin features
- Integrated external APIs for code execution, validation, and evaluation
- Implemented session management, activity tracking, and protected user workflows

AquaTrack | Team Lead | Water Tracker App

React | Node.js | Express | MongoDB

- Collaborated in an 11-person team to build a full-stack hydration tracking application
- Designed and implemented REST APIs for user tracking and data management
- Coordinated team delivery and ensured smooth backend/frontend integration
- Deployed application with registered users and live usage

Work Experience

State Street | Cyber Security Bootcamp (SOC & Fusion Center Exposure)

Dec 2025 - Mar 2026

- Hands-on training in system monitoring, API behaviour, and security concepts
- Explored authentication, access control, and API vulnerabilities through practical labs
- Worked with scenario-based security analysis (MITRE ATT&CK framework)

Independent Software Development Projects

2023-2025

- Built backend and full-stack applications using Node.js, TypeScript, React, and MongoDB
- Designed REST APIs with authentication and role-based access control (JWT, RBAC)
- Developed backend services for data validation, integrations, and secure data handling
- Applied client-server architecture principles across multiple projects
- Worked with GitHub workflows including pull requests, code reviews, and version control

Carlow County Development Partnership | Community Car Administrator

2023

- Managed operational data and documentation with high accuracy
- Supported process improvements and cross-functional collaboration

Zhytomyr Secondary School | Mathematics and Physics Teacher

2006-2011

- Developed strong analytical and structured problem-solving skills
- Experience in communication and explaining complex concepts clearly

Education & Certification

CompTIA Network+ (2026)

Networking fundamentals, protocols, security, troubleshooting

Higher Diploma in Science in Computing | National College of Ireland (2024–2025)

Software development, databases, operating systems, distributed systems, algorithms

Full Stack Developer | GoIT Academy (2023–2024)

React, Node.js, TypeScript, JavaScript, career skills

English with Office Administration | Carlow Institute (VTOS) (2022-2023)

B.Ed. Teacher of Physics and Mathematics | Zhytomyr State University (2001-2006)

Additional Information

Focus on backend engineering, secure API design, and scalable system architecture.

Actively improving cloud deployment and system design skills.

Member of Carlow Dragon Boat Club (competitive team experience).
